

The diagram illustrates the encoding of a 4x4 grid of data into a 5x4 grid of symbols. The data is represented by black and blue vertical bars, and the symbols are represented by black and blue vertical bars of varying heights. The encoding process is shown by arrows connecting the data to the symbols.

The data grid (4x4) is as follows:

Black	Blue	Blue	Blue
Black	Blue	Blue	Blue
Black	Blue	Blue	Blue
Black	Blue	Blue	Blue

The symbol grid (5x4) is as follows:

Black	Blue	Blue	Blue
Black	Blue	Blue	Blue
Black	Blue	Blue	Blue
Black	Blue	Blue	Blue
Black	Blue	Blue	Blue

The encoding process is shown by arrows connecting the data to the symbols. The arrows indicate that the data is encoded into the symbols, with the height of the symbol bars corresponding to the data values.
